SUPPORT GROUP

Support Groups are considered an excellent alternative to surgery and drugs.

Anila has developed an intensive program which uses a combination of releasing past junk; replacing it with positive affirmations, visualization techniques; neuronal clarity and psychotherapy.

During her experience of nearing 2 decades, she has the opportunity to support the children who require special attention & care. She has counseled their parents to help them identify measures to accept each one with their own strengths and weaknesses, and certainly their own personality.

If your child has been dually-diagnosed with Down syndrome & autistic spectrum disorder (DS-ASD) or if you believe your child may have ASD, you will learn much more about what that means, what we are learning through data collection & insights to the evaluation process.
